PARIS, MONDAY, MARCH 31, 1986

Afghan, Angolan Rebels Get U.S. Missiles

By David B. Ottaway and Patrick E. Tyler Weshington Post Service

Bess Transa va. WASHINGTON - The Reagan administration has begun covertly supplying Stinger surface-to-air missiles to anti-Communist rebels in Angola and Afghanistan, according to sources.

Shipments of top-of-the-line U.S. arms to Third World insurgents previously had been barred in lavor of furnishing largely Soviet-

market or from U.S. allies. The reported change in policy is

espected to broaden involvement of the Central Intelligence Agency in Third World conflicts and appears likely to escalate the fighting in Afghanistan and Angola. Soviet helicopter gunships are believed to have inflicted heavy casualties on rebel forces in the past year.

The shift in policy was said to have occurred after activists in the Pentagon and the CIA, backed by and Chinese-made weapons' conservatives in the Senate and also makes it more difficult for the

officials in the State Department and some in the CIA.

Opponents of the change argue that introduction of U.S.-made weapons into Third World conflicts escalates those struggles into U.S.-Soviet confrontations. Those situations pose touchy

problems for neighboring nations trying to maintain diplomatic neutrality while providing a route for U.S.-backed arms shipments.
Introduction of such weapons

on reports that Stingers might be sent to the "contras," or counter-revolutionaries, fighting the Marx-ist government in Nicaragua. The decision to send several hundred Stingers was reported to have followed the Feb. 25 recommendation of an interagency committee made up of senior representatives from the State Department, CIA. Defense Department and the National Security Council staff. The committee plans and coordinates CIA covert paramilitary opera-

Over the past year, the inter-agency review of U.S. covert paramilitary operations concluded that Soviet-backed forces were employ-ing more lethal weapons against Afghan rebels and against the guer-rills army of Jenas Savimbi in An-

One intelligence estimate indi-cates that roughly one-third of So-vict special forces units, trained for counterinsurgency and night com-bat roles, have been deployed in Afghanistan. They are said to have inflicted heavy casualties in recent

months.
In Angola, a large column of Soviet-made tanks and armored vehicles backed by helicopter gun-ships and MiG-21 and MiG-23 jet fighters is reported to be poised for an offensive in the next 60 days to rid the Marxist government of Mr.

complained that the range of the weapons - about two miles (3.5 kilometers) according to Jaoe's Infantry Weapons - is not sufficient to thwan "stand-off" attacks by heavily armored Soviet gunships.

Blacks Set Strike in S. Africa

ESTABLISHED 1887

But Conference Votes to End School Boycott

DURBAN, South Africa - Delceates to a conference on the fight against apartheid voted Sunday to end a boycott of black schools and instead called for a three-day national strike.

The National Education Crisis Committee said 1,500 delegates from local organizations backed the agreement at an all-night conference in Chatsworth, a Durban township.

Spokesmen said that the com-

mittee had decided that pupils should return to school next week. School boycotts have put radical youths at the forefront of clashes with troops and police during two years of upheaval in South Africa's black townships.

The conference urged black adults to join a three-day national strike starting June 16, to refuse to pay rent and to boycott white

June 16 is the 10th anniversary of student protests that began in Jo-hannesburg's black satellite city of Soweto and swept the nation, claiming 575 lives.

The conference also called on foreign companies to pull their money out of South Africa and on foreign governments to refuse landing rights to state-run South African Airways

The committee persuaded most pupils to suspend boycotts earlier this year while it negotiated for them with the government.

Demands for education equal to that of whites and for troops to pull cide with the verdict, the Soviet out of the townships have not yet been met, according to a spokes-man, the Reverend Molefe Tsele.

But he said that the committee was "not giving in" by ool restarting the boycott.

Committee spokesmen did not rule out calling class boycotts in the future. But they said the conference's main aim was to use the seturn to school to organize "alternative education."

This would include political lessons to counter the separate Banu education system, which is widely perceived as teaching black chilstatus.

The spokesmen said that parents and teachers would back pupils' to during the trial. He was acquit-ted with the other defendants on attempts to regroup io student

20 South African Black Leaders Beginning Leadership Training Program in Israel

By Dan Fisher Las Angeles Times Service JERUSALEM — It was the beginning

in the Johannesburg residence where about? Bishop Desmond M. Tuturand three other black leaders were haranguing an Israeli visitor.

They said that it was abhorrent for any nation to have ties with the South African government because of its racial policies, and doubly so for a nation founded on the ruins of Nazi death fac-

The criticism seemed to be even heavier than the Israeli emissary, Shimsbou Zelniker, had expected it to be. As the diatribe continued. Mr. Zelniker recalled the other day, he sought solace in the thought that, with his mission collapsing around him, he would at least have some free time to explore the country.

Then the mood suddenly shifted.

The organizers refused to disclose the director of the Anti-Defamation of the Anti-Defa of winter in South Africa, but it was hot said, 'Now, what should we talk And the conversation turned to how

Israel could help South Africa's hlacks. The first tangible result of that meeting, which took place on June 17, 1985, was expected Sunday, when about 20 South African black leaders were to arrive in Israel to begin a month of technical, organizational and leadership training at the Afro-Asian Institute run by Histadrut, the Israeli trade union federa-

The training program is so sensitive that most officials in Jerusalem refused to talk about it for the record until after they were sure that the trainees were safely out of South Africa. The story of how it evolved, as pieced

tion to Bishop Totu and Mr. Zelniker, a California assemblyman, Tom Hayden; experts at the Center for Policy Options, a Jewish research group in Los Angeles; two representatives of Prime Minister Shimoo Peres; people from the Anti-Defamation League of B'nai B'rith, and an Israeli activist better known for her

work on behalf of Soviet Jews. The promoters have differing visions of how much they can accomplish. At the least, they say, their efforts hopefully will lead to a dialogue between Israel and South African blacks, and in the process help to ease tension between U.S. blacks and Jews.

Some see it as no less than the beginning of a major diplomatic shift in which Israel starts forging ties with the hlacks, ment of South African hlacks.

Punjab Starts Drive Against Sikh Militants

AMRITSAR, India - Security forces went on the offensive in Punjab oo Sunday, killing two Sikh extremists, raiding hideouts and arresting five suspects after 28 persons, mostly Hindus, were killed in the oorth Indian state in two days.

The crackdown was backed by 35,000 paramilitary troops, including special reinforcements. The troops fanned out across the state to enforce a curfew on 10 towns. The Amritsar police chief, S.S. Virk, said about 5,000 paramilitary troops had been deployed in the Sikh holy city after clashes between

militanı Hindus and Sikhs. Twelve persons were killed Saturday and 20 wounded by six gunmen disguised as policemen who rampaged through three villages oear Nakodar.

Julio Ribeiro, who was appointed as Punjah police chief on Friday, visited the scene of the killings to start the crackdown.

The two extremists were killed in a clash with paramilitary soldiers early Sunday about 25 miles (40 kilometers) from Nakodar.

Police also said they seized a vehiele containing guns and ammunition and captured five suspected extremists who might have been involved in the killings. Sixteen Hindus were shot dead

in the industrial town of Ludhiana on Friday in a similar attack by extremists dressed as policemen. At least 100 people have been killed in Punjah this month. Mr. Ribeiro said his priority was

to restore confidence in the police. He ruled out a purge of the force, which critics claim has not cracked down hard enough oo the militants. "The people of Punjab deserve peace, and we will do everything to

achieve that objective." he said. Arun Nehru, the internal security minister, and another close aide of Prime Minister Rajiv Gandhi state Saturday. Mr. Nehru and the Puojah's chief minister, Surjit Singh Barnala, canceled a visit Sattirday to the scene of the Ludhiana killings when Hindu mourners attacked their police escorts

'Trial of the Century' Fell Far Short of Billing

By Michael Dobbs Washington Post Service ROME - The Agea case was described as "the trial of the centupossible proof that the Krem-

ism against the West. If it could be shown that the Soviet bloc was involved in the attempted assassination of the pope, the future of East-West relations could be in jeopardy.

In fact, the 10-month trial of three Bulgarians and five Turks on charges of plotting to murder Pope John Paul II failed spectacularly to live up to its hilling.

Attempts to prove a "Bulgarian connection" to the plot fell apart because of lack of evidence, a poorly argued prosecution case and the hizarre behavior of the state's star witness, Mehmet Ali Agca.

Mr. Agca, a Turkish gunman who shot and wounded the pontiff in St. Peter's Square in 1981, provided the bulk of the testimony against the Bulgarian defendants, whom he depicted as his accom-

plices in the assassination attempt. In pretrial hearings, he described a series of meetings with the Bulgarians in Rome and alleged that he had received the equivalent of ry," possible proof that the Kremlin had sponsored political terror\$1.2 million to assassinate the

NEWS ANALYSIS

Desnite hearings in half a dozen countries and the calling of more than 50 witnesses, the court was unable to trace any of the money allegedly paid to Mr. Agea by the

Bulgarian secret services It was unable to shake the blanket denials of the Bulgarian defendants that they had ever known Mr. Agea. It failed to produce independent confirmation for any direct Soviet bloc role in the assassination

At times, the proceedings degenthe Italian secret services.

Predicting the end of the world. Mr. Agea presented himself to the court at various times as the reincarnation of Christ, an international terrorist and an expert in human behavior "greater than Charles Darwin and Sigmund Freud put together.

The only clear victor from the proceedings seemed to be the pope's would-be assassin. Mr. Agea was able to satisfy his obvious craving for poblicity in addition to keeping the real reasons for the assassinatioo attempt hidden.

A number of questions remain in Among the most important are the relationship between Bulgaria

and a Turkish smuggling ring, and why there were such glaring flaws into the alleged assassination plot. Regarding the connection be-tween Bulgaria and what has been called the "Turkish malia," the trial failed to resolve the mystery surrounding Mr. Agca's stay in Solia in July and August 1980, at a time

when he was wanted in Turkey for a sensational political murder. Evidence produced at the trial showed that Mr. Agea traveled to Bulgaria oo a false Indian passport after escaping from prisoo in Turkey. In Sofia, he had contacts with members of a powerful crime syu-dicate, the Turkish malia, that had been involved in smuggling arms and other contraband into Turkey

ia's Communist authorities.

Proponents of a theory that there proposal. was a "Bulgarian connection" to the papal plot have argued that the Communist authorities used the mafia to hire Mr. Agea to shoot the pope. A rival theory holds that the Gray Wolves exploited their contacts with the mafia to hide Mr. Agea in Sofia after his escape from attorney, said the case had attained immense symbolic importance for

The trial demoostrated large holes in the pretrial investigation into the papal assassination al-tempt. Mr. Martella concentrated on checking out Mr. Agea's "confessions" in prisoo and his allegations against the Bulgarians, while largely overlooking proven links between Mr. Agea and rightist Turks. A new jovestigation has been opened by the Italian authori-oes to plug the gaps in the initial two-year inquiry.

WORLD BRIEFS

Pope Deplores Callousness, Killing ROME (NYT) - Pope John Paul II, in a passionate but somber Earl

message assailing human callousness, declared Sunday that man "ho often made death the method of his existence on earth. Denouncing terrorism, torture, war and abortion, John Paul told a crowd of about 200,000 people in St. Peter's Square that "man unformately resigns himself to death and not only accepts it but inflicts it." A said that "men continually inflict death upon others, people who are

often unknown, innocent people, people not yet born.

The pope also reiterated his invitation to the leaders of all the world's religions to meet in Assisi, the home of St. Francis, this fall to pretogether and work toward a common program for peace.

U.S. Expects Soviet to Push Arms Deals WASHINGTON (NYT) — A U.S. intelligence report has said that the Soviet Union may try to make up for declining revenue from oil export

by increasing its arms sales abroad. The report, prepared jointly by the CIA and the Defense Intelligence.

Agency and made public Saturday, said the drop in oil exports last year

meant that Moscow had billions of dollars less in hard currency available.

to buy grain and advanced technology. But it said the strategy of seiling more arms could founder because the main buyers, the Arab oil-producing countries, are facing similar en nomic difficulties. Last year, the Soviet Union made up the current shortage, estimated at \$3.5 billion, by more borrowing, putting off some purchases and selling gold, the report said.

erated into farce as Mr. Agca, 28, sought to drag everybody into the plot, from the KGB to the CIA to

WORLDWIDE ENTERTAINMENT

Washington Poer Service
WASHINGTON — The Stratepic Defense Initiative has produced no major breakthroughs since President Rousld Reagan first pro-posed space-based missile de-fenses, and much of the program's scientific progress has only high-lighted the difficulties it faces, ac-

cording to a study commissioned by three Democratic senators. The study reports that a space-based defense could face Soviet countermeasures 10 times more daunting than Defense Department officials projected less than wo years ago.

As a result, says the study, the project is probably not feasible without Soviet acquirecence, adding that such cooperation is "diffi-cult to imagine."

The report was written by aides the Senate Appropriations Com-

Midgetman

By Michael R. Gordon

New York Times Service

WASHINGTON - A report commissioned by the Pentagon on

the future of small land-based missiles concludes that the air force should develop and deploy a mo-bile 37,000-pound (16,846-kilo-gram) version that would probably

carry one warhead and decoys to

In a mentionadum to Defense

Secretary Cassur-W. Weinberger, To senior Pentagon officials ques-ifoned the assumptions behind the

study. The memorandum, by Fred C. Ikle and Donald A. Hicks, the

two undersecretaries of defense,

said additional information was needed before key decisions on the

The report and the memoran-

dum reflect sharp differences over

the future of the program to develop a small land-based missile,

dubbed Midgetman.

The missile, under serious study since 1983, would be deployed on

armored launching trucks on mili-tary bases in the Western states. In

a crisis, the vehicles would be dis-persed inside the sprawling bases. At one end of the spectrum are:

advocates of mobility, who empha-

size the need to deploy systems that

can survive attack even if they are

potentially very costly.

At the other end are those who

say the emphasis should be placed on increasing the U.S. arsenal of missile warheads, even if it means

developing weapons that are less mobile and thus more vulnerable to attack.

Mr. Ikle, the undersecretary of

defense for policy, and Mr. Hicks, who is the senior Pentagon official

for new weapons development, said

given number of warheads.

The study said such larger mis-

siles might have trouble crossing

bridges and moving on roads. Air force testimony to Congress has

supported this conclusion, but Mr. Ikle and Mr. Hicks questioned it.

Members of Congress who seek development of a smaller version of

mittee—Lawton Chiles of Florida, J. Bennett Johnston of Louisians, and William Proxmire of Wisconsin — who have supported research on space defenses but at lower funding levels than the administra-

tion has sought.

It finds that the launching and servicing of the thousands of battle stations that would be needed in space may be as difficult as developing the exotic weaponry itself, With current prices and technology, 2,000 shuttle (lights and \$87 billion to \$174 billion would be needed to launch the hardware, acconding to early estimates.

The 62-page report, an unclassi-fied version of which was obtained last week, disputes the contention by Lieutenant General James A. Abrahamson that the program has been proven "technically feasible" and will be ready for a development decision in the early 1990s. General Abrahamson is director of the Pentagon's SDI Organization.

AMERICAN TOPICS

support the research effort, according to the report,

"If anything these working scientists resented the fact that the progress their research has schieved has been inflated, because t undermines their credibility as scientists," the report concludes.

The Senate report is based on interviews with officials and researchers at the SDI Organization, the army's Strategic Defense Command, the Air Force Space Division and two of the three U.S. weapons laboratories, Sandia and Lawrence Livermore.

Telephone calls to the SDI Organization for comment were not returned. Mr. Proximire said the Penwhich held the report for weeks before declassifying most of considered it unbala

Obviausly, we're critics of

Many scientists and program SDL," Mr. Proxmire said. But he managers working for SDI do not said the report demonstrates "the support that view, although they enormous vulnerability of these space-based battle stations" and the cost of "lifting this colossal amount into orbit."

> Since Mr. Reagan called in March 1983 for the development of space-based missile defenses, the Defense Department has outlined the largest military research program in its history. The SDI office is seeking \$4.8 billion for research

Most scientists agree, for example, that the system will not work unless many missiles can be destroyed as they are launched, before they release thousands of warheads and decoys in space. For "boost phase kill," however, SDI would need thousands of battle stations and satellites in space, which would themselves be vulnerable to Soviet attack.

SDI is studying hardening satel-lites to attack, having them maneuver to evade attack, giving them "shoothack" capability and launching so many of them that the Soviet Union could not attack enough of them. Each of those solutions would increase cost and weight, however, and could face Soviet countermeasures.

"In our briefings, we asked repeatedly how our space-based elements would be protected from So-viet space mines," the report says, "We never received a plausible an-

"Scientists at the Sandia Laboratory," it adds, "have come to the cooclusion that space-based. boost-phase defense can never be made survivable, unless by treaty."

A scientist at Sandia said the only solution would be joint U.S.-Soviet battle stations in a plan dubbed MIMAS, for Mutually Implemented Munually Assured Sur-vival. The report finds it "difficult to imagine" such cooperation.

U.S. Drafts New Policy on Admitting Refugees

By Robert Pear New York Times Service

WASHINGTON - The Justice Department is drafting new procedures that would make it easier for citizens of Poland and other Communist countries to gain asylum in the United States. Reagan administration officials

said the new rules would establish a presumption that aliens fleeing "to-talitarian" countries had "a wellfounded fear of persecution" and therefore met the statutory standard for obtaining U.S. asylum.

The new procedures appear to be designed partly to make U.S. policy

come from the United States.

U.S.-Polish relations have re-

mained largely frozen since early

1984, when President Ronald Rea-

sanctions imposed after General

Januzelski's imposition of martial

law and suppression of the labor

Communists in Decline

The decline of the Communist parties is changing the politics of Western Europe.

In parliamentary elections in the 1960s and 70s, the French Communists consistently got 20 percent of the vote or a little better. In 1981 they fell to 16 percent, and this month they were under 10 percent. They have become isolated, no longer fashionable, no longer the mainstay of the left, but instead a sect living in the shadow of a Socialist Party that is now three times as large and, you would have to say, three times as vigorous and interesting.

Western Europe's other mass Communist party in Italy, has been going through a similar erosion. It rose to a peak of 34 percent in the 1976 elections, when it seemed inevitable that Communists would shortly be in the government. But the party seems deliberately to have drawn back from the ideological compro-mises that power imposes. In the last two elections its voting strength has slowly dropped. Meanwhile the country is being governed with great flair by a Socialist prime minister, Bettino Craxi. With nearly three out of 10 Italian voters still supporting the Communists, the party remains much more of a force than in France — no doubt because in Italy it has been less rigidly obedient to the Russians. But the prominence of the Socialists raises, for the first time in Italy, the possibility

of a broadly based non-Marxist left.
Why is it happening in the 1980s? The

passage of time accounts for some of it. For the generation of Frenchmen and Italians who lived through World War II, the genninely heroic achievements of Communists in the underground conferred vast standing on the party. It is generally true that the Communists are strongest today in those places where they led the struggle against the Germans more than 40 years ago. But the actuarial tables are catching up with the people who remember those times of great danger and sacrifice. Their children no longer draw the connection so clearly. What they have seen is the repression, cynicism and economic stagnation that prevails in Eastern Europe and the Soviet Union.

Poverty and turbulence feed Communist movements, and most of Western Europe is now as comfortably prosperous as North America. For many Europeans, getting rich was not a pleasant process. The Communist Party drew strength from the lears and resentments of, say, the southern Italian peasant who found himself working in a northern factory and living in a slum. Rapid economic growth extracts its own kind of costs. But the high growth rates of the 1960s and early 70s have not continued. The economy is changing much more slowly now, and for the past decade life in Europe has been remarkably tranquil. The Communists, as the party of crisis, are having trouble adapting to placed times.

sniffing and saying "spring."

The plant can be as plain or fancy as climate

single trumpet. Still, there it is, in one small

Other Opinion

Daily come fresh charges - and denials concerning the wartime activities of Kurt Waldheim, the former UN secretary-general. Mr. Waldheim, now running for president of Austria, says the evidence of his service to Nazis is stale stuff, the fruit of a conspiracy and in any case overblown. His nonchalance is staggering and his denials are disingenuous. Mr. Waldheim has insisted through all his

years as a world figure that he was never a Nazi and he served only as a conscript on the east-ern front until he was wounded in 1941. His official biographies, like his recent memoirs, have him then returning to Vienna and studying for a law degree. It now develops that he joined a Nazi student union in 1938 and served —only as an interpreter, he contends —in the Balkans in 1942 and 1943 on the staff of General Alexander Löhr. The general was executed for war crimes. Mr. Waldheim's services to him, whatever they were, earned a decoration from the Nazi puppet regime in Croatia, If there was nothing disgraceful in that service, why was it mendaciously covered up?

Perhaps some of the facts were known to Mr. Waldheim's superpower patrons when they made him secretary-general in 1972; governments might have deemed the knowledge

The Easter bonnet is gone now, remembered mostly in Irving Berlin's song. But in homes all over America the Easter plant sits on the table

useful for keeping him in line. Still, it is dis-maying to recall that he would have been re-elected to a third term but for China's veto. That led to the election of an able, more forthright successor, Javier Pérez de Cuéllar.

It won't do for Mr. Waldheim to disdain the new charges as an election play concocted by unnamed conspirators. A photograph showing him with German and Italian officers during his Balkan tour turned up by chance in a curio shop. That and other evidence was found by an Austrian magazine and the World Jewish Congress; other documents have turned up in Yugoslavia. They do not convict him of war crimes, but they contradict his autobiogra-phies and make his new explanations suspect.

"You should not exaggerate," he said to John Tagliabue of The New York Times. "The student union was nothing, a totally harmless, fully uninteresting organization, in which went most of those who wanted to study, to somehow be left in peace." Voluntarily recalled and reflected upon, that might have been believ-able. But such self-exculpation in these circumstances suggests that throughout his highly privileged life. Mr. Waldheim has forgotten too much and learned too little.

Laboratories: The Tail That Wags the Nuclear Dog

PRINCETON, New Jersey — The United States committed itself to

America refrained from testing, Why is there no agreement? One of the most important reasons is opposition from the two principal American laboratories for nuclear weapons design, at Livermore, Cali-fornia, and Los Alamos, New Mexico. Twice, when U.S. and Soviet negotiators seemed close to agreement on a ban, the laboratories raised ob-jections that dashed hopes of obtaining the two-thirds Senate majority required for treaty ratification:

definitely. But it would have been virtually impossible to persuade the Senate to ratify a treaty over the laboratories' opposition, and Jimmy Carter decided not to try.

The key rationale for continued testing under the Reagan administra-tion has also emerged from the lab-oratories. Early in President Rea-gan's first term, Edward Teller, Livermore's founder, met him to pro-X-ray laser as a way to protect America from attack. These talks helped convince Mr. Reagan to launch the Strategic Defense Initiative.

ceal a deeper motivation. Paul Robinson, director of the lavishly funded nuclear weapons program at Los Alamos, has articulated a possible reason
— the intellectual challenge. "At present, the nuclear weapons program in total, both in offensive uses, defense suppression, as well as defense is more exciting than I've ever known it." The designers are developing

methods for penetrating and destroy-ing the defenses they are inventing. Their incessant promotion of new weapons requires that they foster a dangerous illusion - that the next ouclear weapon built by either side may confer an important advantage. But feeding paranois and fantasy about nuclear war fighting is not in America's best interest. Despite what Dr. Teller and Mr. Reagan say, nuclear arms and the threat of nuclear war cannot be eliminated by the in-

vention of more weapons.

Nuclear arms, inherently weapons of mass destruction, are unusable for war fighting. Continued nuclear test-ing is dangerous and a waste of precious resources. The enormous techmical talent at Los Alamos and Livermore should be redirected to meet other pressing national needs. America should fulfill its treaty obligations by negotiating and ratifying a comprehensive test ban.

Josephine Anne Stein, a mechanical engineer, and Frank von Hippel, a physicist, are members of Princeton University's program on nuclear policy alternatives. They contributed this comment to The New York Times.

Terrorism: First Let's Define It

By Flora Lewis

P ARIS — Everybody is talking about terrorism, but not every body means the same thing. For tone time, readers have been whing to ask. "What about aid to the Name guan contras". "What about more la's Savinibi" "What about the is raelis in southern Laboures." raelis in southern Lebanous What about Afghanistan, both sales about Afghanistan, beth sites.

There are many forms of withere in the world. I consider all of them deplorable, whether a car bomb in Benut, a plane or simplifying an enforced psychiatric insimplifying an enforced psychiatric insimplifying at the Soviet Umon, blooming my affecting guan village, the itemperatures.

But different defenses and contermeasures. A major response on dealing with terrorism if the failure in reach a specific definition of what is meant. If the term is bloom of what is meant if the term is bloom of what is meant. If the term is bloom of what is meant if the term is bloom of what is meant if the term is bloom of what is meant if the term is bloom of what is meant in the term is bloom of what is meant in the term is bloom of what is meant in the term is bloom of what is meant in the term is bloom of what is meant in the term is bloom of what is meant in the term is bloom of what is meant in the term is bloom of the will never be an effective accordance from against terrogists.

But it should be possible to be clearer, and so to avoid the distanted allibis for condoming random number of minustred civilians (or redistanted).

clearer, and so to avoid the distasteful alibis for condoming random number of uninvolved civilians for political reasons. The issue is not whether was civil war, assassination or shooting up tourists at an importist more or less disgnating. It is what tone to done about these excuses for blind killing. Terrorism is a specific form of political violence and inquires a specific response, but that cannot be organized without a specific definition. Obviously international cooperation is necessary. There is evidents enough that terrorist groups will quite different causes do coperate Libyan, Irish, franken, German, Palestinian and so on—and cannot be foiled by any nation alone.

Cooperation of autherities to pre-

Cooperation of authorities to pre-Cooperation of authorities to prevent terrorism, however, has sumbled on disagreement about just what is involved. There has been a tendency to approach the problem in terms of what is considered a just or an unjust cause. This becomes an imaperable obstacle, dragging officials who profess to be the toughest opponents of terrorists into the quagnure. When Secretary of State George Shuitz advocates moderate me of force, to capture suspects anywhere

Shift; advocates, moderate use of force, to capture suspects strywhere in the world to bring them to trial is the United States, he is suggesting that America go into the kiditapping business to get even with fadhappers.

Any useful definition of terrors is necessarily arbitrary, making a distinction on the basis not of how here. nous the crime or wanton the violence but of how it is organized. To call one act warfare, another revolu-

tion or countertevolution and another tetrorism should not distribute an order of justification outsided of how to organize a response.

If categories could be established more clearly their months is such better chance that governments could agree at least on trying to suppres

one mindless plague.

An appropriate definition for terrorism might be the line of took against parties who are not involved in a conflict, who do not even enjoyed themselves or know that they are the control of the tering a danger zone, in order to make a political statement. Practically all use of force is intended to frighten and intiluidate. The question is how directly or indirectly it is ap-plied. Certainly, it is not how admira-

ble or repellent the cause.

The importance of arriving at such a nonpolemical definition is that it could bring a big advance toward the kind of international action that might be more effective. However much they may plan and include in violent acts, most governments op-pose the uncontrolled use of lowe lot special purposes. Here is a ground for

a general approach against terrorist.

This may seem cymical in a world that risks much more destructive violence from the organized forces of government, but the facts of a balance of power and political relations impose a restraint that does not now exist on violence without avowed

state responsibility.

There have been hints that the Russians, and maybe even the Syn-aus, who have been targets of dometic terrorism from Arab enemies would not be averse to cutting off the international opportunities for gangs whom they may once have sided but who have become self-propelled. Defining terrorism is the first step to organizing an international defense. The New York Towes.

By Caspar W. Weinberger

Libya's claims to the Gulf of Sidra, only the 12mile territorial sea limit. To show that we do not recognize such claims,

we have conducted freedom-of-navigation exercises many times in many places around the world - in international waters off countries both friendly and hostile. Since this program was instituted in 1979, many of the 90 countries with excessive claims have been challenged.

Libya is the only nation that has publicly threatened - and now used - military force to challenge a freedom-of-navigation exercise in international waters. These actions have pointed out clearly for all to see the reckless and unlawful nature of Colonel Qadhafi's regime, Such actions cannot be tolerated. No one has the right to impede navigation of the high seas or international airspace. No one has the right to shoot at a nation exercising freedom-of-navigation rights. Libyan actions in response to our operations were unjustified and beyond the bounds of normal international conduct. Since 1981 we have

entered the Gulf of Sidra on eight separate occasions. Why the Libyans decided at this particular time to confront these operations with hostile military actions is anyone's guess.

We had hoped to avoid a direct confrontation.

Instead, our naval and air exercises - routine. peaceful and well publicized in advance - were greeted with fire from Libyan military forces. This could have damaged U.S. ships and aircraft

and seriously harmed American personnel. We responded in self-defense.
U.S. forces exercised a great deal of forbear-

directed at them. The fact that we responded in a measured way should dispel any notions that we were looking for an excuse to launch a larger operation against Libyan targets ashore.

Some have suggested that these engagements constitute an act of war. Such a characterization is wrong. The United States was engaged in peaceful lawful naval operations. The Libyans fired lethal missiles. In self-defense and in a limited way, we responded.

If we had chosen to escalate hostilities, the

pretext certainly was there. But that was not our intention and we so demonstrated this by our conduct. This time we happened to be off Libya. Next month perhaps it will be somewhere else and there need be no military confrontations.

What if Colonel Qadhafi had attempted to engage in similar activities against the naval

forces of a less powerful nation or against commercial vessels attempting to exercise their navi-gation rights and freedom in the Gulf of Sidra? The results could have been disastrous.

Some may argue that Colonel Qadhafi has reserved his threats only for American forces, but can we be so sure? Being a global maritime power gives us certain responsibilities to ensure navigation rights and freedoms — not just for the United States, but for flag vessels of all nations, and not only in the Gulf of Sidra but through the Strait of Hormuz or any other sea-lanes that have been threatened with interdiction.

Los Anseles Times

FROM OUR MARCH 31 PAGES, 75 AND 50 YEARS AGO

1911: Christians Revolt in Albania

CONSTANTINOPLE - Rumors were current [on March 30] that Scutari had been captured by the insurgent Albanians, but the Minister of the Interior has received a telegram from the Vali of Scutari stating that the town is holding out against attacks of between 5,000 and 6,000 Albanians. News of the outbreak seems to have brought about a situation akin to panic in the town, the garrison of which has been depleted owing to an expedition to the South. The Vali called for volunteers through the town criers, who proclaimed the Jihad, or Holy War, against the Christian Albanians. In reply to representations by foreign Consuls and the Catholic archbishop, the Vali explained that the criers had made a mistake. Their appeal, however, led to the enrolment of large numbers of Moslem volunteers.

1936: Abdullah Seeks an Arab State JERUSALEM - The Arab masses have been

excited by the news that an appeal has been made to Great Britain for the creation of an Arab State, of which Lawrence of Arabia once dreamed. This move has been made by the Emir Abdullah, Arab ruler of the British Mandated Territory of Transjordan. He has sent a message to the British expressing the wish that they ask the French government to grant an Arab Union in the French Mandated Territory of Syria and Transjordan, or, alternatively, that Transjordan and Palestine, both of them British mandated territories, should be united. The Arabs contend that the British promised them a Pan-Arab Federation, and that pledges were conveyed through Colonel Lawrence. In-stead, they add, they find Palestine, their terri-tory, being flooded with Jewish immigrants.

The People Are Fed Up With Apocalyptic Rhetoric

WASHINGTON — The major change of this decade in American politics is largely unnoticed: the

end of the apocalyptic style.

Apocalyptic politics begins with a sense of imminent demise. It sees history not as a progression of ups and downs, but as a line on a graph headed toward some abysmal discon-tinuity. In the 1970s and '80s, one favorite abyss was ouclear. Remember the great freeze debate of 1982?

"I support the freeze because I do not want to die," said Representative Barbara Mikulski on the floor of the House. "We are coming ever so closer to the brink of nuclear annihilation." said Representative Edward Markey. "We are going to have Armageddon at any moment," said Representative James Weaver. And so on. The other favorite end-of-the-

world scenario had the industrial world running out of resources. Remember the prestige and weight ac-corded the Club of Rome report? The Club, a committee of wise and breathtakingly shortsighted men, predicted in 1974 that we would soon be wracked by waste, economic stagnation and scarcity. By now we should have run out of practically everything — gold, tin, silver, mercu-ry and, in a few more years, oil. Apocalyptic thinking reached such

a pilch that it no longer took bad news to set off the doomsday bell. Too much good news could do the trick. First it was oil running out. Then in 1983 the first cracks in OPEC occasioned an avalanche of warnings about how free-falling oil prices would cause economic catastrophe.

By Charles Krauthammer ...

oil prices warned that if it happened too quickly, collapse was in store. First Mexico, then Cirbank, then the world. The doomsayers overlooked the obvious fact that any sudden cut in oil prices would produce a windfall for the industrialized world that would far exceed—and thus, if necessary, easily cover - any shortfallin oil-producing debtor countries.

The apocalyptic era is over. Look at recent days. The United States conducts a nuclear test, exploding a Soviet-imposed morstorium, and draws back-page coverage and a yawn. The United States shoots at Libya, Nicaragua invades Honduras, Iran pushes into Iraq — and the fi-nancial markets yawn. Five years ago a rifle shot in the Gulf region would have sent gold (and oil) prices sky-rocketing. In 1983 there was panic at the prospect of oil prices suddenly falling to \$20 a barrel. In 1986 prices drop from \$28 to \$12 — in three months. No Armageddon. No panic. What has happened to the apocalyptic sensibility? First, it was

mugged by a reality that proved too mundane. False prophecy engenders doubt. The Millerites (now Seventh Day Adventists) predicted that the world would end on March 21; 1843. Then again on Oct. 22, 1844. Then

they stopped predicting. Second, apocalyptic fever cannot be sustained forever. It is too exhausting, too psychologically taxing.
Third, apocalyptic thinking owed a
lot to a Galilean shift in consciouscould cause economic catastrophe.

The control of the 70s. That was when, for the

first time in history, we saw Earth from space. The stark image of a small, iragile planet suspended in space evoked feelings of global fragil-ity and vulnerability. That image is now almost two decades old. Its shock has been absorbed and its force dissipated. It is by now too trite to evoke millennial dread.

What follows apocalyptic politics? Regional polities. Apocalyptic politics implies that one cause fits all, dooms all. Regional politics recognizes that the world is a mess of problems, if not totally discrete, then distinguishable. And certainly not all hanging from a single thread. The oil-price crash and the attendant disinflation, for example, have

not led to a general collapse. They have led to a painful but manageable contraction in certain regions: the "oil patch" (of the U.S. Southwest), the farm belt and some oil-producing countries. Real problems in real piaces. But not the end of the world. In foreign policy, too, the stage has years ago wholly dominated America's national consciousness, has been displaced by regional conflicts. Local starms in specific places: Afghanistan, the Philippines, South Africa. Nicaragua, South Korea. Not one-world but pointillistic politics.

One of the reasons why Mr. Reagao failed to arouse the populace with his recent televised Nicaragua with his recent televised Nicaragua Shatter Alamo Myth" (March 25), speech was its tone. It was apocalyp-does well to recall that myths abound returned, largely due to the presi- pendence. And, yes, a principal one is

mality. Three years ago the idea of a Soviet warhead landing in Lawrence, Kansas, elicited high ratings and higher anxiety. Today the idea of a red tide lapping up soon at San Diego elicits derision. The post-apocalyptic era is no time for alarums. Popular uninterest in red tides and

dent's own bulling influence, to nor

evil empires should come as no surprise to the president. It is no longer four minutes to midnight. It is morning in America — remember? — and morning is the time when you reach for the butter, not for guns. Washington Post Writers Group.

The state Department urged other untions that there "might be some against Americans abroad, has privately asked West European and reassess their travel plans during five-day U.S. naval exercise in the vately asked West European and reassess their travel plans during Middle East nations to increase the congressional recess after Libytheir security for American diplo- an threats of reprisals against Americans.

> any planned trips be canceled," said Charles E. Redman, a State Department spokesman. "We have, however, expressed our belief that the need for travel at this time should be carefully evaluated." Mr. Hart, who planned to leave

Saturday on a trip to Israel, Egypt and Jordan, said that administra-tion officials "indicate my planned trip would divert limited security

[Mr. Johnston told The Associated Press on Friday that the Defense Intelligence Agency had "strongly cans in the Middle East.

The increased security in Western Europe included the following actions: ason to expect terrorist activities in the Middle East in the coming week and expressed concern that these activities could be directed against any prominent Americans

Disappointing for Shultz Washington wanted "to blow the whistle" on Colonel Qadhafi for his

Allies' Response on Libya

"outrageous behavior." Countries including Italy, Turkey. France, and Greece - all of which Mr. Shultz has visited on his trip -have told him that the action against Colonel Qadhafi only ennanced the Libyan's prestige and was probably counterproductive, an aide to Mr. Shultz said.

The Italians told Mr. Shultz that while they agreed with the United States that it was improper for Libya to have fired on the American ships and planes that went into the Gulf of Sidra and that it was legally justified for the United States to fire back, the tactics employed hy

Washington were inappropriate.
Mr. Andreotti, who nettled American officials in October when he criticized American tactics in intercepting the Egyptian airliner carrying the hijackers of the cruise ship Achille Lauro, also complained about the failure of the United States to inform Italy beforehand that it would cross into the contested waters of the Galf of

Mr. Andreotti also said that the American use of force was incon-sistent with the efforts being undertaken at the East-West conference in Stockholm on seeking an agreement opposing the use of force...

■ Chile Is Added to List

Mr. Shultz has included Chile in a list of dictatorships that are "the odd men out" as democracy spreads through the Western Hemisphere, The Washington Post Raid to Push reported from Rome.

It was the first time Mr. Shultz had applied the term "dictator-ship" to the military presidency of General Augusto Pinochet, who took power in a coup against an elected leftist government in 1973.

The remark appeared to be part of recent efforts by the Reagan administration to increase pressure on Chile to move toward democratic elections.

"In the Western Hemisphere. we've seen a remarkable trend in the last 10 years, so that by now the countries ruled by dictatorship are Chile, Paraguay, Cuba and Nicara-gua," Mr. Shultz said at his news conference. "They're the odd men

A White House official said that Colonel Oadhafi's "track record of supporting international terror-ism and statements that Americans should pay a price for U.S. policies had led to concern in the last-week-about the potential for a dramatic act of revenge against

Colonel Qadhafi said last week that he would assemble suicide squads and strike back at Americans in the Middle East.

In Italy, an Interior Ministry spokesman said that border and airport checks had been tightened and security increased in areas already under heavy guard, such as major government buildings and

 In Vienna, a spokesman for the Interior Ministry, Alexander Hirschfeld, said that border and arrort security already had been increased substantially. But he added, "We have stepped up security around the U.S. Embassy, American offices and citizens anything to do with America."

In West Germany, where 300,000 American soldiers and their dependents are stationed, Friedrich Zimmermann, the interior minister, said that American installations were always under heavy gnard but that the risk was "currently greater than usual."

Britain said that Libyan resiats would be closely monitored and that it would be "more difficult than ever" for Libyan supporters of Colonel Qadhafi to enter the coun-

SHITTES BATTLE PALESTINIANS — A Shiite Moslem militiaman, watched by a comrade, runs for cover during weekend fighting with Palestinians at the Sabra and Chatila refugee camps in Beirut. Militia sources said eight persons were killed Saturday in fighting with rocket-propelled grenades and machine guns that broke out after gunmen threw hand grenades at a checkpoint of Shiite Amal militiamen at Chatila. Fourteen persons have been reported killed in three days of clashes around the camps.

As PLO Rebels Return To Former Strongholds, Attacks on Israel Resume

By Ihsan A. Hijazi

New York Times Service BEIRUT - Less than four years after Israel invaded Lebanon and drove an estimated 12,000 guerrillas of the Palestine Liberation Organization out of Beirut and southern Lebanon, the deadly cycle of guerrilla attack and Israeli retaliaion appears to have resumed.

Last Thursday, a Soviet-made Katyusha rocket slightly injured four Israelis at a school in Kiryat Shemona, which, before the Israeli invasion, was the symbol of all northern Israeli settlements exposed to PLO attacks.

The wounded were the first civilian casualties suffered by Israel as a result of rocket attacks from Lebanon since the start of the Israeli invasion in June 1982.

A Palestinian spokesmao io southern Lebanon said that four rockets had been fired at a military academy in the town hy guerrillas of el-Fatah, the faction that is the power base of Yasser Arafat, the PLO leader.

Israel's revenge was swift: With-in hours its planes bombed two sites, near the port city of Sidon, that are being used by Fatah as it re-establishes itself io southern Lebanon. The police said that 15

Analysts Remain Upbeat Despite Market Caution

By CARL GEWIRTZ

ARIS — A blanket of caution enveloped the Eurobond market last week. The long Easter holiday weekend, with all markets closed Friday and Britain's market closed on Monday, had investors vacationing and traders wary of making new commitments. The cautious mood was further heightened by a wariness that the long weekend would be a perfect time for European authorities to realign exchange rates within the European Monetary System.

Another factor contributing to the slowdown was the near

Belgium offered \$300 million of five-year ootes carrying a coupon of 74 percent and priced at a premium of 1014, while Denmark tapped the market for \$250 million with seven-year, 74-percent paper priced at 1004. Subtracting the 1%-percent front-end fees gave a cost of 35 basis points, or 0.35 percent, over the benchmark U.S. Treasury rate for Belgium and about 40 basis points over for Denmark - levels that analysts considered too

By week's end, the Belgian paper was trading at about 50 basis points over the Treasury yield, while Denmark was at 54 basis points over. However, even at these levels, there was no rush to

Chevron's \$300 million of 10-year bonds were priced at about 62 basis points over the benchmark with a coupon of 81/2 percent, an issue price of 1001/2 and fees of 2 percent. Trading at a discount of 2½ points by week's end, the paper was yielding about 90 basis points over the yield on Treasury paper and still sitting with underwriters who were trying to stabilize the price.

RITICS who argued that Belgium and Denmark were simply priced too thinly to astract investors allowed that Chevron's pricing was realistic. But they added that investors have only limited interest in U.S. corporate paper and that does not include oil companies, even one that is rated double-A.

The only new issue to trade inside the fees paid to underwriters. was for the finance unit of Long-Term Credit Bank of Japan,

LTCB Finance. Its \$100 million of seven-year bonds were priced.

at 100% bearing a coupon of 8 percent and ended the week down 1% points, well within the total fees of 1% percent. Sterling was the only buoyant sector of the market. A shortage of government paper in the domestic market and a conviction that interest rates are headed lower drove domestic investors into

the Euromarket while foreign investors, attracted by the highest coupon rates paid on a European currency, also piled in. Land Securities, the largest British property company, pushed for the most aggressive terms — the longest maturity yet seen at 21 years with the lowest coupon of the long-dated bonds at 9½ percent, about 4 percent below the offering yield on Hanson Trust's 20-year bonds offered at 1004 with a coupon of 10

percent. Both companies raised £100 million. Subtracting the 21/2-percent front-end fees, the cost of money (Continued on Page 9, Col. 1)

Golden Chains Bind Wall Street's Stars

By Steven Prokesch
New York Times Service
NEW YORK — All over Wall Street, investment banking houses are slapping their employees in handculfs: "golden handcuffs," to be precise.

Even the most prominent firms appear to be tortured by the fear that their stars will get a better offer from a competitor and jump

To make sure they stay on board, such firms as Morgan Stanley; Bear. Stearns and L.F. Rothschild, Unterberg, Towbin are trying to bind them with lucrative arrangements that often promise them tens of thousands, if not millions, of dollars with only one condition: They must stay around awhile to collect. Such a fear may seem astonish-

ing in an industry where a starting pay of \$50,000 to \$75,000 is the norm and compensation that is not well into six figures after a few years is the exception. But the reason for the fear is simple. Wall Street has gone public. Morgan Stanley sold its stock to the our-side world for the first time on March 21 And in recent months Bear, Steams; L.F. Rothschild and Alex. Brown Inc. have done

While the firms were still privately owned, the hope of being able to make partner, and the millions that could accumulate with the title, were enough to guarantee the loyalty of younger stars. But now that "the brass

ring," as a partnership is known in Wall Street, is quickly becoming a relic of a bygone era, that is no longer true.

Determined to make sure that the résumés of their employees do not go public with their shares, these Wall Street firms seem to be trying to outdo each other in showering stock and options, pay raises and investment opportunides on "key people" among the partners and others they want to

It remains to be seen whether

this will work, but if it does not, it will oot be for lack of trying.

The 95 partners at Bear, Steams, who are formally called managing directors, the modern Wall Street name for partner, last year made a gift of one million shares, now valued at \$32.5 million, to about 1,500 of the company's 4,300 employees. As much as 10,000 shares apiece went to those rising in the profession who were not lucky enough to have made partner by the time the firm went public last October. Anoth-

ownership plan for all the em-

That certainly eased the pain," Alan C. Greenberg, the chief executive of Bear, Stearns, said.

Morgan Stanley and L.F. Rothschild are struggling to be perceived as just as fair to their nonpartners, according to insid-

Morgan internally reallocated its stock before it went public, according to one source who asked not to be identified. In some instances, it took shares from senior people "who may not have been putting out as much as they used to," the source said, and sold them to those valued employees below them who did not have as much. A Morgan spokesman declined to confirm this report. The firm also recently sold 450,000 shares in employees who had oo previous stake. It sold them at \$56.50 each, substandally below the \$71.25 close for that week on the New York

Stock Exchange. Similarly, L.F. Rothschild sold 982,200 shares at book value, or \$10 each, to approximately 225 nonpartner employees just before going public on March 13 at \$20.50 a share. And it has also awarded 1.5 million options to 240 people to buy more stock at the same price.

"We tried to provide an ownership interest to everyooe we (Continued on Page 11, Col. 6)

U.S. Businesses **Expect to Create** 3 Million Jobs

NEW YORK -- American businesses plan to create nearly 3 million new jobs in 1986, a strong increase from the 2 million jobs added last year, according to the results of an annual Dun & Bradstreet Corp. survey released Sun-

Small business once again will do most of the hiring, with companies that employ fewer than 100 workers providing nearly two-thirds of the expected new jobs, the business information company said. "Both business executives and

consumers are optimistic about the prospects for economic growth this year and this optimism is clearly reflected by the results of the survey," said Joseph W. Duncan, chief economist for Don & Bradstreet.

The smallest U.S. businesses those employing fewer than 20 roll increase, 7.4 percent, according to the survey results.

Companies with 20 to 99 employees expect a 6.9-percent increase in employment.

Businesses with fewer than 100

employees account for more than 90 percent of all companies in the United States, Dun & Bradstreet

The largest U.S. companies forement in 1986, it said.

Companies employing 25,000 or more workers plan to increase their employment by 0.6 percent, which will contribute only 3 percent of the new jobs, Dun & Bradstreet said.

The survey results indicate that. all U.S. companies employing 500 more workers will contribute just 24.6 percent of the year's new

Large companies have been careful about increasing their payrolls and in many instances have turned to temporary and part-time belp. Mr. Duncan said.

"Many large firms have been striving to maintain the lean operating characteristics they developed during the recession," he said. This 'lean and mean' approach workers - expect the largest pay- has helped them to increase their efficiency and productivity, and they've been caudous about jeopardizing that by pumping up their payrolls too ambitiously.

"The current business-cycle recovery has been characterized by a high level of entrepreneurial activity and, as a result, much of the job reation has occurred in smaller firms in recent years," he said.

The survey was based on a sam-ple of 5,000 companies selected from records on more than 8 million businesses at the National Business Information Center of Dun & Bradstreet. The companies that composed the sample are statistically representative of the dis-tribution of businesses by size in the United States. A breakdown of the results by

industry shows 40.6 percent of companies in the finance, insurance and real estate sector planning to add workers, the largest percent-

In contrast, only 8.7 percent of the companies in the mining sector plan to add employees.

In virtually all other industry sectors, the percentages of companies planning to add workers range from about 20 percent to 30 per-

Singapore Report Suggests Ways to End 'Serious Recession' into protecting local industries, a veloped economy, we cannot pay tal absence of natural resources,

By Barbara Crossette

New York Times Service BANGKOK - The government of Singapore, admitting that its economy is in a "serious recession." has published a tough and comprehensive policy review calling for a reduction in the country's high rate of savings, a two-year freeze on wage increases and a low-ering of both corporate and personal taxes.

steps already have been taken. The review also recommends less government involvement in the economy and more aggressive development of new economic sectors. Resisting the temptation to pump more government money

Tool Orders Fell Again In February

By Agis Salpukas

NEW YORK - New orders for machine tools in the United States continued to decline in February, dropping 11.1 percent from the February the year before, the Na-tional Machine Tool Builders Association reported Sunday.

The trade group said that February was the eighth consecutive month that oew orders have dechined, compared with the corresponding month the year before.

The group said that new orders for machine tools in February were \$211.1 million, up 10.6 percent from January, when orders totaled \$190.8 million.

James Gray, the president of the association, said that the signs were

"We are seeing an increase in shipments, which certainly helps the cash flow," he said, "but still oo turnaround in net new orders."

"The mannfacturing industries are caught in the middle as Congress and the president debate the various tax proposals," Mr. Gray

Metal-cutting tools increased 25 percent in February, to \$168.8 million, from \$135 million. New orders for metal-forming tools de-clined 24.2 percent in February, to \$42.3 million, from \$55.8 million in Total machine tool shipments

for the month stood at \$202.6 million, up 38.9 percent from January.

U.S. Judge Skeptical on Bhopal Settlement Plan

By Tamar Lewin New York Times Service NEW YORK - The federal judge handling the Bhopal claims has made it clear that he is skeptical that a proposed \$350-million settlement can succeed.

U.S. District Judge John F. Keenan, in a transcript of a meeting Tuesday with lawyers in the case that was made public on Thursday, said that the publicity about the proposed settlement "clearly queers it."

week that it had reached the tentative settlement with lawyers repreleak at its plant in Bhopal, central

Soviet Plans Incentives For Workers

Agence France-Presse

MOSCOW — The Soviet leadership has adopted a broad series of measures to increase efficiency in farm production and to improve

locentives for agricultural producers were detailed in a 4,000-word resolution of the Soviet Communist Party's ruling ceotral committee published Sunday by

the party newspaper, Pravda. Beginning this year, the state will pay double the basic price for extra cereal beyond the average supplied during the past five years, the reso-

The incomes of managers of state farms and of collective farms will be linked to a farm's overall sales, while bonuses equal to the basic wage are planned for the best

Producers of meat and milk will be able to dispose of their surpluses as they wish after meeting their quotas for sale to the state. They will no longer have to go through a central authority to sell the produce oo the spot or to other republies or regions.

Recently created agricultural-industrial committees, established at every administrative level, will have the right to set their own retailprices for fruit and vegetables pro-

duced and sold locally. **■ Trade Rose in Bloc**

cuts in Japan's already very low interest rates. The discount rate Trade between the Soviet Union and other socialist countries rose Meanwhile, the Bank of Japan more than 7.5 percent in 1985. Agence France-Presse reported has intervened in currency markets to prop up the U.S. dollar and

According to government figures published over the weekend, the trade last year totaled 86.5 billion rubles (\$118.9 billion).

The government news agency Tass said in a recent commentary that "trade and economic cooperation between the Soviet Union and socialist countries - its main trading partners - were characterized by dynamism and a steady trend of development"

Soviet purchases from all these countries rose by nearly 10 percent during the year, to 42 billion rubles.

In value, trade with East Germany was worth 15.20 billioo rubles; with Czechoslovakia, 13.40 billion rubles; Bulgaria, 12.47 billion ru-bles; Poland, 12.04 billion rubles; Hungary, 9.41 billion rubles; Cuba, 7.99 billion rubles; Yugoslavia, 6.06 billion rubles; Romania, 4.23 billion rubles; China, 1.6 billioo rables; Mongolia, 1.5 billion rubles; Vietnam, 1.45 billion rubles, Industrial production has fallen strength included construction and and North Korea, 1.05 billion ru-

when their firms go public.

Despite these lucrative consolation prizes, some investment bankers question whether they will placate those younger personnel who dreamed of attaining the riches and prestige that partner status could

bring.
"If partnerships work, you can look forward to making a whole lot more money than in a public company," said Jeffrey B. Lane, Shearson's vice chairman and chief operating officer.

Stephen A. Schwarzman, president of Blackstone Group, a small private Wall Street firm, said: When a firm goes public or is sold. it's clearly upsetting for guys about to be made partner who have in-vested six, eight or nine years of their oves in the firm."

"It removes one of the major enets you've shaped your life by." added Mr. Schwarzman, a former partner at Lehman Brothers Kuhn Loeb, which was purchased in 1984 by Shearson American Express and is now called Shearson Lehman Brothers.

When Bear, Steams went public late last year at \$21.50 a share, the company's partners, who paid an average of \$8.92 for the 39.3 million shares, including convertible preferred shares, they nwned. found themselves instantly sitting on a paper profit of \$493.8 million.

Similarly, Morgan Stanley's 111 managing directors and 143 principals are sitting on a potential for-tune. When Morgan's shares finished their first day of trading on March 21, the 19.7 million shares they collectively owned instantly were worth \$1.4 billion, or \$1.1 billion more than they had paid for them. The stake of each of Morgan's four top executives is worth between \$48 million and \$55 mil-

After a firm goes public, however, it typically pays out more in

partners are finding themselves total annual compensation to hold from \$50,000 to \$500,000 richer people it wants to keep, according to investment banking officials, executive recruiters and compensa-

tion consultants. "If a vice president below partner was making \$300,000 in annual pay before, maybe he would make \$350,000 to \$375,000 afterward," said Abram Claude, executive director of Russell Reynolds Associates, a recruiting firm.

Besides raising compensation, the publicly owned firms are also giving employees options to buy the company's stock and they are being much more generous about giving both partners and nonpartners a chance to buy in on transactions the companies struc-

ture or underwrite. While many of the plans that the newly public companies are establishing have lucrative payouts, there is typically one key condi-tion: Participants must stay for a certain period of time to reap the full benefits, sometimes as long as 5 to 10 years.

But even without these "golden handcuffs," there would not necessarily be a mass exodus of those whn had their hearts set upon making partner. With the exception of Goldman, Sachs and Drexel Burn-ham Lambert, there are not that many large private Wall Street firms left.

When Shearson acquired it, several partners at Lehman and 20 percent of those employees below the partner level left, Mr. Lans said. And there is still talk on Wall Street that several more Lehman partners will leave when their contracts that prohibit them from joining a competing firm expire next

Mr. Lane believes that, with most major investment banks now public, Shearson's numover prob-lems are history. "Looking forward to that big golden plum of a partnership may be a moot issue," he

THINKING IN TIME: The Uses of History For Decision-Makers

By Richard E. Neustadt and Ernest R.

May. 329 pages. \$19.95. The Free Press, 866 Third Avenue, New York, N. Y. 10022.

Reviewed by George McGovern

HIS is a book by two Harvard professors I who believe that "the fun to be had from reading history has it all over that of reading almost anything else about real people." Their love of history leads them to a fascination with decision-making in the U.S. political process. Clearly they would agree with former Senator John Culver that "politics is the only game in town for adults." Their obvious joy in exploring history gives this book a sprightly, tolerant and deeply human flavor. But their subject the relevance of history to government policy choices - is deadly serious.

In examining some crucial foreign policy decisions in the recent past that now seem mistaken, notably the Bay of Pigs invasion and the intervention in Vietnam, the authors avoid smug hindsight and the temptation to claim too much for their proposition that a sense of history can be valuable in reducing the risk of poorly conceived decisions.

Of their proposed historical method for decisioo-makers, worked out in large part in a course they teach at Harvard's Kennedy School of Government, they write: "If our students (including policy-makers and their staffs) were baseball players, we would not expect to turn out Ted Williamses or Sandy Koufaxes; we would be happy to see a batting average go up from 250 to 265 or an earned run average go down from 6.0 to 5.0. And we do believe that almost any continuous effort to use history routinely will improve the averages of players in the public arena."

The two key words emphasized by Neustadt and May in fashioning a historical method for decision-making are "prudence" and "caution." Take the time to ask hard questions

before you decide, they repeatedly warn. Enmethod we propose, questions that shed light almost regardless of the answers.

Their historical model for decision-making contains several elements. First, an effort miss be made to appreciate the problem at hand by separating its elements into what is known what is unclear and what is presumed "Focising on matters of evidence provides momentary protection against the natural tendency to react to trouble by saying 'Damn! What do we

do? instead of 'What's our problem?" Second, since many policy-makers with a sense of history frequently resort to historical analogies, the authors very properly warn against an undiscriminating use of analogies. They suggest a second test: What are the life nesses and the differences between the current

ination and the historical analogy?

In my view, the most abused and most costly historical analogy since World War II has been the frequent invocation by U. S. policy-unkers of the "lessons of Munich." By appearing His ler at Munich, the lesson goes, we set the stage for World War II under even more dangerous circumstances. The Soviet Union, via Korea Cuba, Vietnam, Afghanistan, Nicaragua or Angola, has created a potential Munich. Let in therefore apply the lessons of Munich and intervene to stop these manifestations of Hiterism and thus avert World War III.

The defense-minded, inward-looking Soviet Union — paranoid after three nearly invasions from the West — is not analogous to Adolf Hitler, an expansionist psychopath. Neither are Ho Chi Minh, Fidel Castro or the Sandinistas. Historical analogies are fine if properly drawn, but they are dangerous in the hands of policy-makers who lack the capacity to discern historical differences.

The third historical test recommended by Neustadt and May is "the Goldberg Rule." It is the question posed by Avrain Goldberg, a New England retail executive who tells his store managers when they come with a prob-lem. "Tell me the story." In other words, give me the historical background:

If President Jimmy Carter had asked that question, write May and Neustadt, he would have learned that the supposedly newly disper-ered "Soviet Brigade" in Cuba, revealed in 1979, had been there since at least 1962. With that knowledge he would not have assumed that the presence of Soviet troops in Cuba called for a chilling denunciation and ultima-tum to the Soviet Union, which contributed to the death of the SALT-2 treaty.

I commend this book to lovers of history and to U. S. policy-makers who will heed the advice of its authors to use it with "cautions and prudence."

Former Senator George McGovern, who was a rojessor of history and political science at Dako ta Wesleyan University from 1949 to 1953, wrote this review for The Washington Post.

Capitals Lose 2 Key Men, Patrick Edge

Compiled by Our Staff From Dispatcher NEW YORK — The Washington Capitals had a rough weekend. After losing two key players to in-jury, they lost their undisputed hold on first place in the National Hockey League's Patrick Division. But all was not lost for the Capi-tals. Their 6-6 overtime draw Saturday with the Hartford Whalers in

NHL FOCUS

Hartford, Connecticut, was good enough to leave them in a tie for first with the Philadelphia Flyers in what is perhaps the NHL's hottest The Flyers overwhelmed the

New York Rangers, 8-2, on Saturday in Philadelphia. On Friday night, the Capitals' center, Bengt Gustafsson, had his leg broken in a 4-3 loss to the New York Islanders in Landover, Mary-

land. He is out for the rest of the season. Earlier in the day, Mike Gartner, Washingtoo's secondleading goal scorer with 35, had surgery to repair torn cartilage in his left knee. He will be out about

wo weeks.
Washington will begin postseason play April 9. Gustafsson, Washington's leader

in assists, collided with New York's Denis Potvin just 19 seconds into the game and broke a tibia bone in his right leg. Elsewhere, the Quebec Nordiques clinched first place in the Ad-

ams Division with a 5-3 victory over the Los Angeles Kings at Inglewood, California, on Saturday. The Islanders' victory over the

Kevin Hatcher of the Capitals belped teammate Scott Stevens put the Islanders' Bryan Trottler into the boards.

and 58th goals of the season in the first and second periods. Alan Haworth scored on a power

play for Washington at 13:28 of the middle period but a power-play goal by Brent Sutter extended New York's lead to 42 at 6:19 of the third. Craig Laughlin scored for the Caps at 7:11.

The rough contest included 99 penalty minutes and the ejection of the New York goalie, Bill Smith. A television replay of a second-period melce showed Smith punching Haworth while the Washington player was being held by New York's Rich Kromm.

The following night in Hartford, Capitals was largely the work of Larry Murphy scored on a 40-foot Mike Bossy, who scored his 57th (12.2-meter) slap shot with 2:05 re-

maining in regulation to give Washington its tie with the Whal-

The Whalers scored three goals, with Kevin Dineen getting two, to take the lead in the third period before Murphy tied the game with his 19th goal of the season. The Flyers, meantime, got two second-period goals from Tim Kerr

to break open a close game against the Rangers. Kerr's goals, which gave him 54 this season, moved the Flyers to a 5-2 advantage. At Inglewood, Peter Stastny

scored three goals and assisted on two to power the Nordiques to

SPORTS BRIEFS

Scots Beat Romanians in Rugby, 33-18 BUCHAREST (IHT) — Scotland, the Five Nations co-champion with France, overwhelmed Romania. 33-18, in rugby on Saturday, scoring three tries in the second half. Flyhalf Geln Ignat supplied all Romania's points with a drop and five

Five penalty goals by fullback Gavin Hastings gave Scotland a 15-12 lead at half time. He converted the tries by his brother, center Scott Hastings, flanker John Jeffry and hooker Colin Deans. The fullback's 21 points equaled the Scottish record he set against England last month.

The Romanians, who were dominated in the scrums and in the loose, will play France in Lille on April 13.

Mize, at 16 Under, Leads TPC Golf by 4

PONTE VEDRA, Florida (AP) - Larry Mize stalked away from the field with a 5-under-par 66 and established a four-stroke lead Saturday in the third round of the Tournament Players Championship.

Mize, 27, completed three rounds over the windswept Players Club in 200, 16 under par and one stroke better than the old 54-hole record for the event. John

Mahaffey shot 65 and was at 204 going into Sunday's final round.

Mize birdied two of his first three holes Saturday and two of his last three.

Turkoman Wins Widener in Record Time HIALEAH, Florida (NYT) — Turkoman set a track record en route to a dramatic victory over Darn That Alarm and Gate Dancer in the Widener Handicap

on Saurday at Higlesh Last in the field of six turning for home, Turkomar, with Chris McCarron riding, made a sensational stretch drive. Turkoman won by half a length in 1:58 3/5, one full second faster than the record for 11/4 miles set by Bald Eagle 25 years ago.

Navratilova's Sister Is Reported to Defect BONN (UPI) — The 23-year-old sister of Martina Navratilova, the tennis star, has defected from Czechoslovakia and wants to emigrate to the United States, a

West German oewspaper reported Saturday.

West German oewspaper reported Saturday.

Jana Navratilova, accompanied by her fiance, had arrived in West Germany from Austria on a tourist visa issued by the West German Embassy in Prague, and was now in Bonn, the daily Cologne Express reported.

It said Jana Navratilova, described as an accomplished tennis player, had sought political asylum in West Germany and had applied to the U.S. Embassy in Bonn for

permission to emigrate to the United States.

Martina Navranlova, 29, obtained asylum in the United States in 1975 and became a citizen in 1981.

For the Record

Giberto Roman of Mexico took the World Boxing Council junior bantamweight title away from Jiro Watanabe of Japan with a unanimous decision over 12 rounds in Itami, Japan, on Sunday.

A world record for the women's 3-kilometer walk (1.86 miles) was set Saturday at a their victory over the Kings.

Sign Disappears, As Does Sifford's \$100,000 Prize

Los Angeles Times Service LOS ANGELES - Charlie Sifford made a hole in one at Mountain Gate Country Chib in the first round of the Johnny Mathis senior PGA tourname and won a 1986 Buick. He did not get the other announced prize: \$100,000.

As the earlier groups went through on Friday, a sign on the 168-yard (153-meter), par-3 15th announced that the first pro golfer to get a hole in the there during the 54-hole tourishment would be given a Buick and \$100,000.

The sign was put there inadvertently, according to the tour-nament director, Tom Hebert, and nobody seems to know when it was removed. But it was not there when Sifford hit a five-iron shot-that rolled into

"There was a lack of communication," Hebert said, "We had the sign printed because we hoped the deal for \$100,000 would go through. We knew earlier in the week the plans had. fallen through. However, no-body told the person responsi-

ble for putting out the sign. "According to PGA rules, if the sign is there when the hole in one is made, the golfer would be entitled to the money." Sifford, who shot 73, did not

know of it until told by reporters after his round. "It shows you the kind of luck I've been having," he said.

Then, thinking it over, Sifford grew less philosophics and indicated that would the op the matter with officials of the Professional Golfers Asso-

Wagner should have been gone by now, but he broke his wagner should have been gone by now, but he broke his foot last season, sat out his first senior year and finds himself now playing a second. Hall is a jump-shooting white kid now playing a second. Hall is a jump-shooting white kid from eastern Keniucky, the kind of kid who, historically, was from the West is now playing a second. Hall is a jump-shooting white kid now playing a second. Hall is a jump-shooting white kid from eastern Keniucky, the kind of kid who, historically, was from the West is now playing a second. Hall is a jump-shooting white kid now playing a second. Hall is a jump-shooting white kid from eastern Keniucky, the kind of kid who, historically, was from the West is now playing a second. Hall is a jump-shooting white kid now playing a second. Hall is a jump-shooting white kid from eastern Keniucky, the kind of kid who, historically, was from the West in the particle of the particle o Hitter, an expansional from eastern Kennexy, the kind of kind who, instancing, from the West is not an expansional product. Why he did not is the subject of a later paragraph, are Ho Chi Minh. Fidel Che, player in the country; with him, all things were possible. Yet mistas ffistorical analogos as he has never averaged more than 15 points per game in the country, with him, all things were possible. It is drawn, but they are damped to follow-makers who lad the big games against Memphis State, Kansas and Syracuse, be stood accused of Cardinal sin and was boosed by the home

three historical test recommendates and the Goldberg fans.

Wagner first, He had 22 points and 11 assists Samraay question posed in Arran (see and three of those assists came within the 4 minutes, 24 managers when they come with seconds of 17-1 rock and roll hootchy-koo that Louisville put managers when they come with a second half.

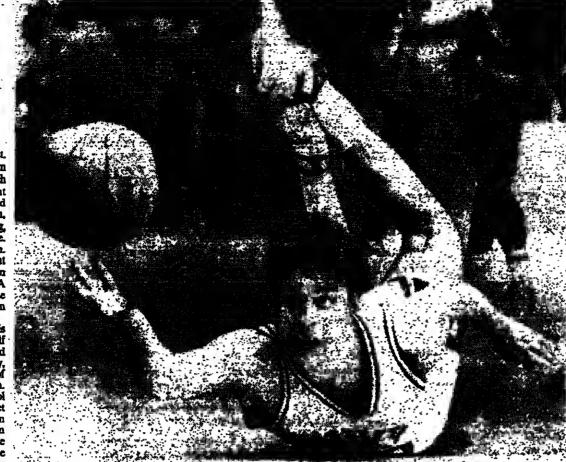

President Jimmi Carier had a "I'm the one who's supposed to do that," Wagner said.

"I'm the motivator. The gays all look to me."

"I'm the motivator. The gays all look to me."

He has been to three Final Fours now, and this one seems the sweetest. The second game of last season he broke a bone.

earned that the supposed to be six weeks of "Soviet Brigade" in Cuba as "sectivity turned into eight months: had been there since at least a supposed to be six weeks of including the would not be a sould not be a did was go to school and go back to the hospital. I was like an the presence of Soviet least a did was go to school and go back to the hospital. I was like an the presence of Soviet least a did was go to school and go back to the hospital. I was like an the presence of Soviet least a did was go to school and go back to the hospital. he presence of Sound from a did was go to senous and go used to the transport all kinds of for a chilling discount from a outpatient." He healed so slowly there were all kinds of for a chilling denunciation at rumors in Louisville, including one that the foot had been

Mark Alarie of Duke dives for a loose ball during the Blue Devils' 71-67 semifinal victory over Kansas.

secretly amoutated. Last summer, while walking downtown, pins, no nothing, it's a real foot," Wagner insisted.

After starting slowly, shooting only 37 percent through Louisville's first seven games this season, Wagner has played like a sure first-round draft choice. "I had a lot of confidence in my doctors, and I made my comeback on schedule. My goal was to lead this team to the Final Four, and here I am. Next, Hall, who had 14 points Saturday night. He is the only white starter on Louisville's team, a program that has,

in the last decade, overwhelmingly if not exclusively featured Wagner was coerced into actually taking off his shoe and black players. That was no small concern to the locals when sock to show someone that the foot was indeed real. "No Hall chose Louisville over Kentucky.

They wondered why I did it," Hall said. "We made the Final Four my freshman year, and I went home and told them: 'Now you see why.' I've never had the slightest problem fitting in at Louisville, none whatsoever. There's nore to our team than just baskethall. Deep down I love these guys. You ask me why I went to Louisville? They wanted me. Kentucky didn't get interested in me until after I'd committed to Louisville, And look around. We're still playing in this tournament. Where's Kentucky?"

And finally, Thompson. He was la crème de la crème when he signed, rated over Walter Berry, Brad Daugherty, Roy Tarpley and Kenny Walker, to name a few. Thompson was compared to Dr. J. and Bernard King and was said to be the prototypical Louisville player: long, graceful, can jump over the moon. The ratings have been well scrambled since then and Thompson has suffered in comparison, particularly seainst Kentucky's Walker,

"I'll leave it up to you to decide whether I've been overrated or underrated," Thompson said softly. But he allowed that "it's been a messed-up four years, pretty

Yet Thompson is having a spectacular tournament, shooting 68.5 percent. He abused Steve Hale in Louisville's win over North Carolina, and Samrday night he held John Williams to two points in the second half — none after the 15:13 mark. How much one game counts for is hard to say, but Thompson had a great one against LSU: He made 10 of 11 shots, scored 22 points and took I0 rebounds.

"The critics," he said, "are seeing some of my game they

haven't seen. In defense of a career that will look better cumulatively than one season at a time, Thompsoo said: "I've shown them I can score 30 points, get 10 rebounds, dish out six assists.

Fve done that this year."

In defense of Thompson, Hall said: "People should get off his back, Billy Thompson's the man that makes us go. People say he hasn't lived up to expectations. That's crap. We won games this year, He must be doing something right." There is only one game left to this season. And Louisville (AP, UPI) is in it. How many more questions can there be?

Duke, Louisville Advance To NCAA Basketball Final

By Roy S. Johnson and William C. Rhoden

New York Times Service DALLAS - Everyone waited, but the moment never came.

It seemed only a matter of time Saturday before Danny Manning, the gifted 6-foot-10-inch (2.08-meter) forward from Kansas, would again emerge to lead the Javhawks to victory as he had done so many times this season. Yet on the day when they needed him most, he

Instead, the sophomore ended his enigmatic season with one of his worst performances and the Blue Devils of Duke, the nation's topranked team, defeated the Jay-hawks, 71-67, to advance to the championship game of U.S. college basketball.

In the first game of Saturday's donbleheader, Louisiana State's dream of a championship season ended in the face of overwhelming talent as Louisville overcame an eight-point halftime deficit and raced to an 88-77 victory.

Louisville's 16th consecutive victory gave it a 31-7 record and put the Cardinals into Monday night's title game against Duke, 37-2.

Manning, who came into the semifinal contest shooting, 60 percent and leading the Jayhawks (35-4) with a 17-point scoring average, made only two of his nine shots before fooling out with 2 minutes, 47 seconds remaining.

Meanwhile, the game's other heralded star, the Duke guard Johnny Dawkins, was a singular terror. He scored a game-high 24 points and made a critical play on what proved to be the game-win-

When Duke's forward Mark Alarie missed a jump shot, Daw-kins tipped the ball to Danny Ferry, a freshman reserve, who sank the shot that broke a 67-67 tie with 23 seconds left.

Both teams squandered leads in drama-filled second half. Duke gained a 45-40 advantage early, only to see it disappear under an 8surge that Kansas built on three fast breaks and two baskets from Ron Kellogg, who led the Jayhawks with 22 points. Kansas brought its lead to 59-55,

with 8:10 left, on another fastbreak basket, this one by reserve forward Archie Marshall. But he injured a knee on the play and did not participate in the rest of the Then the Blue Devils countered

two missed shots and a turnover by ansas with a parade of six free throws that gave them a 61-59 lead with 7:11 left. The score was again tied three

times before Alarie's missed jumper was tipped by Dawkins into the hands of Ferry.

Some Ins and Outs Of the Tournament

New York Times Service DALLAS - During the last decade, teams of the Atlantie Coast Conference have become a virtual fixture, reaching the Final Four in seven seasons. North Carolina has made three appearances (1977, 1981 and 1982), Virginia two (1981 and 1984). Duke two (1978 and 1986), and North Carolina

State one (1983). Conferences with their own posiseason tournaments have dominated the Final Four, producing all 20 participants since

No independent has reached the semifinals since DePaul in

This year's Kansas team was the first from the Big Eight to reach the semifinals since the Jayhawks of 1974.

Louisville, in its fourth semifinal appearance in seven seasons, is the only Metro Conference team to reach the championship game; it won the title in 1980.

The last three NCAA champions all held the lead at halftime of the title game.

With their 37th victory, the Blue Devils have won more games than any other college team in history, surpassing the mark set by Kentucky in 1948.

In the first half, Dawkins had relied on his quickness and a deft use of screens to dissect the Javhawks' humbering man-to-man de-fense. He missed on only two of his and gambled that LSU's guards, first nine shots, and ended the half with 15 points.

Louisville will be making its second appearance in the title game in the 15 seasons that Denny Crum UCLA, where Crum once was an ers. assistant coach to John Wooden.

Billy Thompson, the 6-7 forward and inspirational leader, sparked the ferocious second-half comeback with pinpoint shooting and amothering defense against John Williams, LSU's outstanding sophomore forward.

Thompson, who had averaged 18 points and 8.3 rebounds a game during Louisville's five tournament victories, scored 22 points on 10-of-11 shooting and grabbed 10 re-

But it was his defense on Williams that helped Louisville win for

liams, a 6-8 forward who has the versatility and creative instincts of a guard, was a wrecking crew to the first half. He scored 12 points most of them over Thompson -on a variety of spinning one-on-one

moves and fadeaway jumpers.
Williams took only six shots and made one in the second half. Meanwhile, the Cardinals, who trailed by 44-36 at the half, outscored LSU by 52-33 in the second period on 63

percent shooting.

They did the same thing in the second half that they did in the first; my shots weren't falling," said Williams, who seemed to take the loss harder than any of his teammates. "You have to ask them what they did different,"

"We didn't do anything that different," said Thompson, who picked up three fouls while guarding Williams in the first half and finished the game with four. "When I left the game with three fouls, I thought we did a pretty good job of switching off and help-

ing ont."
The Louisville guards did their part on defense, preventing their LSU counterparts from popping a quick pass to Williams inside or on the wings.

With Williams ineffective, the Tigers, whose late-season surge has been marked by grit more than talent, were no match.

"John's our hread and butter; he's our leader," said Don Redden, who paced LSU with 22 points. "Without him in the game, we're just a mediocre team.

The Louisville front line had been outhustled in the first half by Redden and by Ricky Blanton, a 6-7 guard who was converted into a center. But in the second, the Cardinals sealed off the rebounding who made 8 of 15 shots in the first

They did. Anthony Wilson made 4 of 10 and Derrick Taylor 2 of 7. allowing the Louisville defense to has coached the team. The Cardi- concentrate on rebounding instead nals won the title in 1980, defeating of spreading to challenge the shoot-

half, would cool off.

Pervis Ellison, Louisville's 6-9 freshman center, finished with a game-high 13 rebounds.

"Their defense is what hurt us," said Dale Brown, the LSU coach. 'We couldn't do any more than we did. We tried every defense in the book, but they speeded the game up and we started exchanging baskets with them. You can't do that against a team that has that much

"But I'll say this for our guys," Brown said, "They played their hearts out, and I'm proud of them. Disappointed that we lost, but the 20th time in 21 games. Wil- proud of what we accomplished."

S pelley-makers who will benk Cambridge Crew Ends Oxford's Streak authors to use it with long

The second move sent Joe Niekro storming into the executive trailer at Fort Lauderdale Stadium to discuss the way the Yankees had treated his elder brother,

Phil Niekro, a 21-year major leaguer who will be 47 on April 1, said he and his brother thought the Yankees had used him to lure back

Joe. New York acquired Joe Niekro in a trade with Houston last September. Joe feels to a certain point I was used for bait," said Phil Niekro,

discussing what may be the end of his 300-victory career. faith in front office people. They knew all along I wasn't going to

make it with them." agreement on new contracts on Phil Niekro will get just \$62,154 in Jan. 8. The terms in Phil Niekro's termination pay.

contract were involved in the tim-

Baylor had asked the Yankees cause he did not want to be a parttime player.

Lou Piniella, the Yankee manag-

er, said Easler would platogo with Gary Rocnicke as designated hit-

Phil Nickro won 32 games for the Yankees in the two seasons he pitched for them. But after he became a free agent, there was no interest in signing him until Piniella became manager and expressed a desire to have him. Then there was the matter of Joe Niekro's return.

"I am bitter," Joe Niekro said after emerging from the executive He added that "it makes you lose trailer. "We're not just hrothers, we're friends."

He signed a three-year contract worth \$2.5 million. His hrother Both Nickros were free agents agreed to a contract for a conguarafter last season and both reached anteed \$250,000. With his release,

Baseball's Generation Gap Is Agape

Players Today Bigger, but Elders Dispute the Tag Better

By Ira Kaufman United Press International

TAMPA, Florida - Few dispute that today's baseball players are higger, faster and stronger than those of the 1950-70 era. But are they better? Some Hall of Famers, pointing

to seven-figure contracts with incentive clauses covering everything from walks to waistline, say the modern game cannot compete with their golden age. "I've been on the major-league

level for 30 years," said Don Drysdale, former right-handed pitcher for the Los Angeles Dodgers, "and today's players may be big and strong but I've never seen so many injuries. I know one thing for sure: they're oot any better than we were. They don't know the game as well, but oowadays they don't have to. The era of the '50s and '60s may never be equaled for talent. I don't better trained and physically more good," Kaline said. "The very top know how good the players were talented. But it seems to me players before that period, but I know it's used to have more fun playing. In don't believe today's players have not like that today."

majors last year, and that would

Aaron and Willie Mays in their pampered stars. prime. Only one pitcher, Bert Blyleven, had more than 16 complete around now are better than we games; Bob Gibson and Juan Mar-ichal used to reach that figure by the All-Star Game. "You used to know that if you

dido't win 20 games, you were gonna get a cut the next year," said Marichal, six times a 20-game winner. "Now you can have a lousy year and get a raise. Today you hit 260 or .270 and sign a big contract. I think you have the same caliber of players today, but if you sign a \$1millioo contract l don't think you're goana play as hard."

Harmon Killebrew, who bad eight seasons with at least 40 homers, thought big money was taking some joy out of the game.

"I'm all for the present-day ath-lete," be said, adding that "they're don't want to pay the price to be

Warren Spahn has seen quite baseball will be like."

have been a bad year for Hank enough of what be termed today's "I'm not so sure the ballplayers

were," he said. "The thing missing

from today's players is pride," Bob Feller offered a tangible explanation for today's paucity of 20game winners.

"I think the top players now — guys like George Brett and Dale Murphy — would be equal to the top players of my time," said Feller, "but the cycle right now is there aren't too many great arms. That's because fathers aren't giving

Perhaps the most vociferous critic of the modern-day ballplayer is Al Kaline, who cited a lack of dedication.

their boys enough time to develop

as pitchers.

Antal Dorati, Nearing 80: Living Musical History

By Andrew Clark

T ONDON - It is easy to like Antal Dorati and just as Hungarian accent, the way his face lights up out of its Beethovenian scowl as he tells a story, the willingness to admit he has had his faults - all are part of a charm that has eased his path through one of the most restless of 20th-century musical careers. Nowadays part of his charm is his age. Dorati will celebrate his 80th birthday April 9 with a concert at Royal Festival Hall in which he will conduct the Royal Philharmonic Orchestra in Bee-

thoven's Ninth Symphony.

Dorati is a piece of living musical history. There are not many conductors who can claim to have discovered their Beethoven symphonies and by recordings but by running through four-hand piano reductions as a child, or to have played celesta in the first performance of Bartok's "Dance Suite," or to have angered the conductor Erich Kleiber by beating the chimes in double time during a rehearsal of the Berlioz "Symphonic fantastique." For every anecdnte about those early days in Budapest there is another to illustrate each of the subsequent stages nf his career, which began with a conventional opera house apprenticeship in Hungary and Germany, continued with the Ballets Russes on their worldwide travels, and has left him credited with more recordings and principal conductorships than almost any of his colleagues.

Dorati concedes he has mellowed over the years. The temper — which he said he had inherited from his father is less in evidence. He now places more importance on composing than on performing the works of nthers. He has put behind him the Inng postwar rift with Hungary. He has found a permanent home in Switzerland and ended the orchestra-hopping of yesteryear in favor ol more

stable, if less intimate, musical relationships.
"I suffered from so much moving about. I never lelt insecure, but one must be rooted. Music may be an internatinnal language, but where it comes from is the soil: that is what the composers of today have lorgotten. Their music does not belong. It is no good saying that instead of a humeland, one has the world. The world is no replace-

ment for a sense of belonging.

"In the end, perhaps I was able to turn it to my advantage. I was able to accumulate the data from my travels and assemble them into one pot, which was my own life, and which finally does belong: in the root of my uphring-ing, in Central Europe. It's a kind of full circle, a completinn. And in my life as a composer, too: When I left Bu-dapest I lost my strength. Then after a long gap I came hack to it, and I came back in it on the same line. I am still writing Hungarian music, not à la Hongroise, hut music that has its root in my childhood and in my father's childhood."

The welcome that Dorati now receives in Budapest seems to have played an important role in that sense of "completion." World War II enforced the first long separation, and Dorati was a U.S. citizen when he went back to Hungary after the war. The Communist takeover of 1948-49 led to a rift that lasted almost 20 years, deepening when Dorati showed support after 1956 for the newly formed orchestra of Hungarian exiles, the Philharmonica Hungarica. By the mid-1960s, however, the invitations had started flowing again. At first he went back every three years. The visits became annual at the time of the Bartók and Kodály centenaries in 1981 and 1982, and this year be is returning to Budapest twice, to the spring and fall festivals.

Antal Dorati and soloists in a performance with the Royal Philharmonic.

"The nrchestras there can do extraordinarily well if they want to, but like the great mass of nrchestral musicians, they are living an everyday life. My hig advantage is that I don't live an everyday life, and the way I use it is to make these people come nut of their everyday existence for the few hours that we are together. If I am successful, it's not the applause of the audience that counts, but the interest of my colleagues. That doesn't matter whether it's in Budapest, London nr any nther place. But it does have special significance if it happens where I began my life and career."

In the West, most of Dorati's chief conductorships have turned out to be short-term relationships. His 11year partnership with the Minneapolis Symphony, starting in 1949, was by lar the longest, Doran said the problem with his other American orchestras - at Dallas. Washington and Detroit - was largely one of finance. "People didn't take my suggestions; it was not understood what was needed. It was practically always my destiny to come before the good times. Possibly the good times would have come a bit later if I hadn't been there. I don't dare to say they wouldn't have come at all; they would have. But I think my presence accelerated the circulation. ft is not a had thing to be a stimulant. Looking hack, I think that was my main destiny.

"You can stay too long with an orchestra, and it hecomes dull. One of the good things about my itinerant life now is that I never stay long enough to be dull. When I come back, I am greeted with a great hello, and I gn hack with a great hello, with passinn, It is my conviction that anyone who is on the podium has to create an event

each time, and when I'm not able to do that any more. then my job is to gn away. And there is a limit. I have energy for nnly about 500 appearances in the same place. Well, I dnn't know what the exact number is. Maybe it's 600, maybe 1,000, nr 200. But there is a limit in everyone. Perhaps there is a person whose limit would be a million.

There is another theory, that you do not have to make an event each time, that there is a normalcy in art con-sumption. I do not subscribe to that view. But some people believe it. In composition it is the same. There are composers - Saint-Saëns was one of them - who maintain that musical sound does not need to take off where the word stops. Saint-Sains said nn, they can go parallel, that I can say 'Good morning' in music just as dispas-sionately as I can say it in words. Beethoven didn't believe that, Saint Saens did. And in a way Saint-Saens proved it. He said 'Good morning' very often - and nothing more. He thought this was legitimate, that this was what was required of him in art.

Well, going back to performance, some believe that a decent performance is enough. I don't think it is. My sentiment is that if I do not provide an event, I am unhappy. Then I think I wouldn't be doing justice to my job. But I know that I have colleagues whn give a performance and think they have done their job. And they would be just as honest a person as I am."

Antal Doraci conducts the Royal Philharmonic Orchestra in Beethoven concerts in London on April 4, 7 and 9.

LANGUAGE

Caught Up in 'Flagrante Delicto'

By William Safire

Washington — An oddly named cast of characters domiciles itself in the attic of my mind. The leading lady is Norma Loquendi, a sassy modern woman with the common touch who levels every hoity-toity suitor with her street smarts. She has a seriousminded sister with less of an attic shape named Licentia, a member of the media who shoves microphones in people's faces. Both women are menaced by N. Flagrante Delicto, a hig guy in a white suit who looks like an easily catchable Sydney Greenstreet, and are in love with

Lex Terrae, played by Tarzan. These names, of course, are derived from Latin phrases: norma loquendi is "everyday speaking," or common usage; licentia loquendi is land"; and in flagrante delicto is the Latin term for "caught in the act" blazing," presumably coined when with a better deal." an arsonist was caught with lighted Roman candle in hand.

In flagrante delicto is rarely used by Norma and the rest of us because it has acquired a lightheartedly leering connotation, perhaps from use in cases when someone guilty party.

Tass, the Soviet news and propa-

ganda agency, used the phrase the nther day with a straight face, betraying a lack of understanding of the arched eyebrow and mock shock associated with the phrase in the American idiom. According to Tass, a second secretary at the U.S. Embassy "was detained . . . in flagrante delicio as he was having a meeting with a Soviet citizen recruited by the United States intelligence." (Tass meant "apprehended in flagrante delicto," and detained later.) The Tass translator can be forgiven for his decision to use Latthe common English expression, red-handed.

dnned or even appreciated. When too often, gives in.

The Times of London wrote an obituary for the vinuperative jourfrom editor, is quite different from nalist William Cobbett in 1835, it to publish the verb that led to pubsaid, "Nitor in adversum was a mot-lisher; to edit most often means "to" to to which none could lay equal shorten, strengthen, clarify," and

claim." Readers then did not have an editor is supposed to be the perto break their heads to figure out son who makes the necessary cuts,

tion," both of which applied. I discovered in a used-book store a disbound translation of the for-

the double meaning: "struggle in checks for accuracy and adds the adversity" and "shine in opposi- required qualifiers. Every editor must be partly copy editor, because news makes words just as words make news, and a great editor is the eign quotations in Blackstone's language's best friend.

Peppering one's speech and writing with Latin phrases is affectation, but if done with good humor or a special aptness. it can be condoned or even appreciated.

Commentaries. Therein lies a store of useful observations, like the Michaels is the editor, who is also compassionate Furiosus furore so- an editor in the more restricted ham punitur. "A nut is punished by sense of the term. Recently, he his own nuttiness" (my transla-"liherty of speaking," or free tion), and de bene esse, a must for speech; lex terrae is "law of the any political dealmaker or oil-comtion), and de bene esse, a must for pany purchaser: "to be accepted. for the time being subject to - literally, "while the crime is change if somebody comes along

Continuando, people who have had it with acrimony can say Inter-est reipublicae ut sit finis litium, or "For the public good, let there be an end to contention." Pundits can proudly say scribere est agere, "to write is to act," and a self-righteous surprises a spouse in bed having a soul can identify himself as custos morum, "keeper of the morals," while those diplomatically selling out brave allies can exhume salvo

pudare, "decency being abserved." Clip these ant and keep them in your wallet; a little Latin goes a long way, as they say at Tass.

1 00 many editors have degenerated into shovelers.

The etymon of editor is the Latin edere, "to give out, to publish," and some editors still think of themselves as the people who put out the news. Usually these are people who have the title the editor (or editor in chief, executive editor, editor and in because he could not readily use chief executive officer, etc.). But somewhere in the composing room nl language, a specialized meaning Peppering one's speech and writ-ing with Latin phrases is affecta-film became one who prepared mation, but if done with good human terial for publication. The editor or a special aptness, it can be con-still grandly gives out; an editor, all

. At Forbes magazine. James W. gave his copy desk the green light to delete business jargon.

Banished from the magazine are such misusages and bromides as revolution applied to changes anywhere, such as an auditing revolu-tion; upscale when "affluent" is meant (one of these days, Forbes may even bring back "rich"); pajety for "expensive": superstar ("What's a mere star?"), and downside risk ("What's an upside risk?").

Strictly rationed, though not forbidden (to be spooned rather than shoveled ont), are such knee-jerking phrases as Rust Belt, Third World, fast track. He frowns on the gruhby grabbers of hands-on management, eschews bells and whistles and the omnipresent world class, and homes in on free fall. (Have you unticed Awash in oil has been replaced by free fall in prices?)

What about verbs to describe the movement of prices of stocks? Forbes will not use soar or phase et on movements of less than I percent on the Dow Jones average; I take this to mean if the market jumps 18 points, it jumps but does not soor, and if it drops 5 nr. 10 points, it drops, declines, moves down, retreats, dips, sinks or sells off. but does not plummet.

Plummet, for the editor's notebooks, comes from the Latin phonburn, the heavy metal known as lead. In the event of a sudden rise in interest rates or universal profittaking, nobody would dare use the crass crash or bust; the tired simile to be avoided on husiness pages, would be like a ton of bricks.
